Divyanshu Kumar

Data Analyst

+91-8544171827 rajdivyanshu358@gmail.com LinkedIn GitHub

Summary

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Skills

Programming Languages: Python, SQL
Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Streamlit, Flask
Data Analytics & Visualization: MS Excel, Power BI, Exploratory Data Analysis (EDA), Data Cleaning
Tools: Jupyter Notebook, Git, VS Code
Web Technologies: HTML, CSS
Areas of Interest: Machine Learning, Deep Learning, Data Science, AI-Powered Applications

Projects

Energy Optimization Platform | *Python, Pandas, NumPy, Streamlit, Machine Learning* **2026**

- Developed an AI-powered analytics platform to analyze energy consumption patterns and generate data-driven optimization recommendations.
- Performed data cleaning, exploratory data analysis (EDA), and feature engineering to identify key factors influencing energy consumption.
- Built and evaluated machine learning models for energy usage prediction to support proactive consumption planning and optimization.
- Designed interactive Streamlit dashboards with KPIs, trend analysis, and visualizations to communicate energy insights effectively.
- **Achievement:** Won the Consolation Prize at the GNA University Hackathon, Punjab, for developing the project.

FoodGuard AI – Food Quality Analytics Dashboard | *Python, Pandas, NumPy, Plotly, Streamlit* **2026**

- Developed an interactive analytics dashboard to assess food quality and analyze adulteration risks across Milk, Honey, and Spice categories.
- Cleaned, processed, and analyzed food quality datasets using Pandas and NumPy to identify quality patterns and generate actionable insights.
- Built interactive Plotly dashboards with trend analysis and comparative visualizations for clear interpretation of quality metrics.
- Implemented rule-based risk scoring and confidence evaluation to classify food quality and highlight potential adulteration risks.
- Automated analytical reporting to improve result tracking and support data-driven quality assessment.

Training

Industrial Training in Python Programming and Data Science | *NIELIT, Gorakhpur* **June 2025 – July 2025**

- Developed practical skills in Python programming, NumPy, Pandas, and Matplotlib for data analysis and visualization.
- Studied machine learning algorithms and core data science concepts through hands-on training.
- Performed data exploration and visualization tasks to analyze and interpret datasets.

Education

I.K. Gujral Punjab Technical University (IKGPTU) | *B.Tech, Computer Science (CGPA: 7.3)* **2023 – 2027**

DR. R.M.L.S College | *Higher Secondary (12th) – 76.8%* **2023**

R.P.H.S Narma | *High School (10th) – 71.6%* **2021**
